I.G. Govt Arts and Commerce P.G. College
Vaishali Nagar, Bhilai.

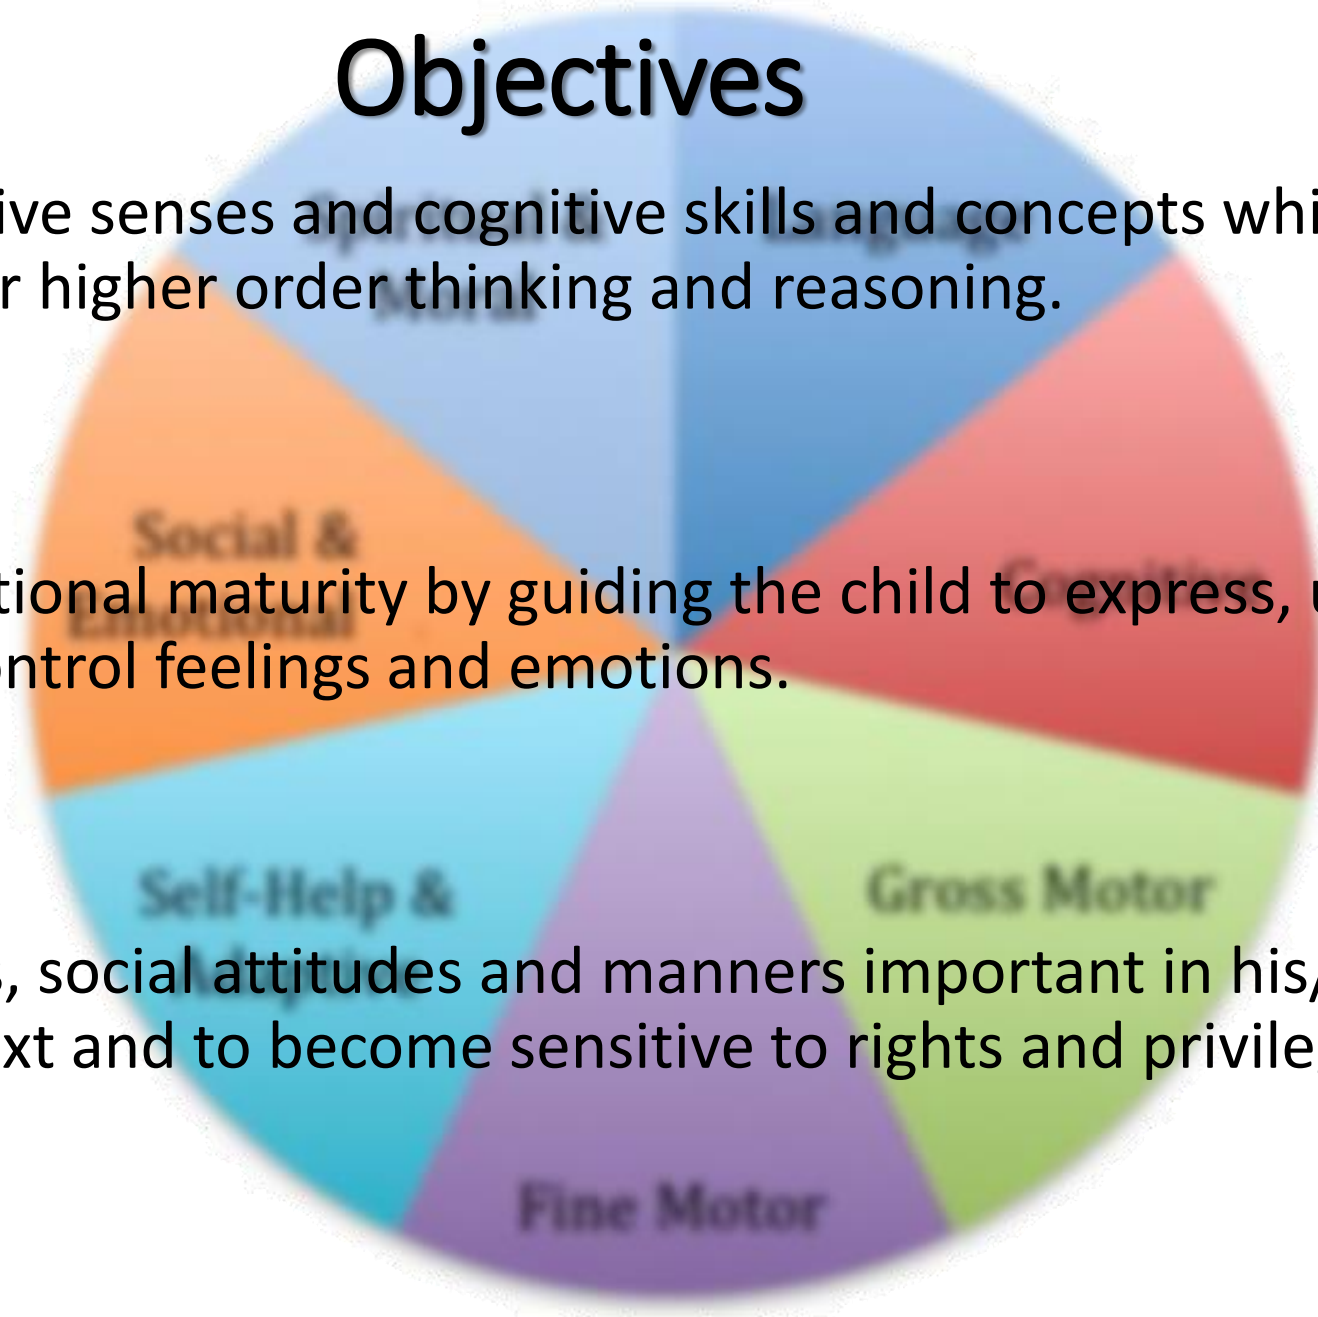

Introduction

- **Adapting the surrounding's instilling learning habits and developing physical, mental and social skills are few of the objectives of early childhood education.**
- **Little kids are the blooming buds of our society. When the kids are young, they are curious about every new thing they see, every new word and often have unlimited questions for every unique experience they go through. enrolling a child in a school or adapt to new surroundings and also contribute to overall development.**

Objectives

- Develop the five senses and cognitive skills and concepts which are foundation for higher order thinking and reasoning.
- Develop emotional maturity by guiding the child to express, understand, accept and control feelings and emotions.
- Imbibe values, social attitudes and manners important in his/her socio cultural context and to become sensitive to rights and privileges of others.

Objectives

1. Socialization- Humans are very social beings and the main concept of socialization takes root in early childhood.

2. Cooperation- During this phase, children share, cooperate, take turns and so on. These are all part of a secure social life.

Objectives

3. Holistic Development- As a human being, it is important to have a strong foundation. It is every aspect of the personality such as emotional, social, mental and physical.

4. Enthusiasm of Life long learning: Children will develop a hunger for learning if they are taught fun and exciting activities.

Objectives

5. Value of Education: The new environment provided in preschool gives children an entirely different perspective on the requirement of education.

6. Respect: The environment in preschool helps children learn to become civil towards one another and they start to understand that the concept of respect is not just limited to people and belonging but also their environment.

Objectives

7. Teamwork: A person's teamwork capability is based on their respect for others' opinions.

8. Resilience- Our society is every changing and it is important to develop resilience as early as possible.

Objectives

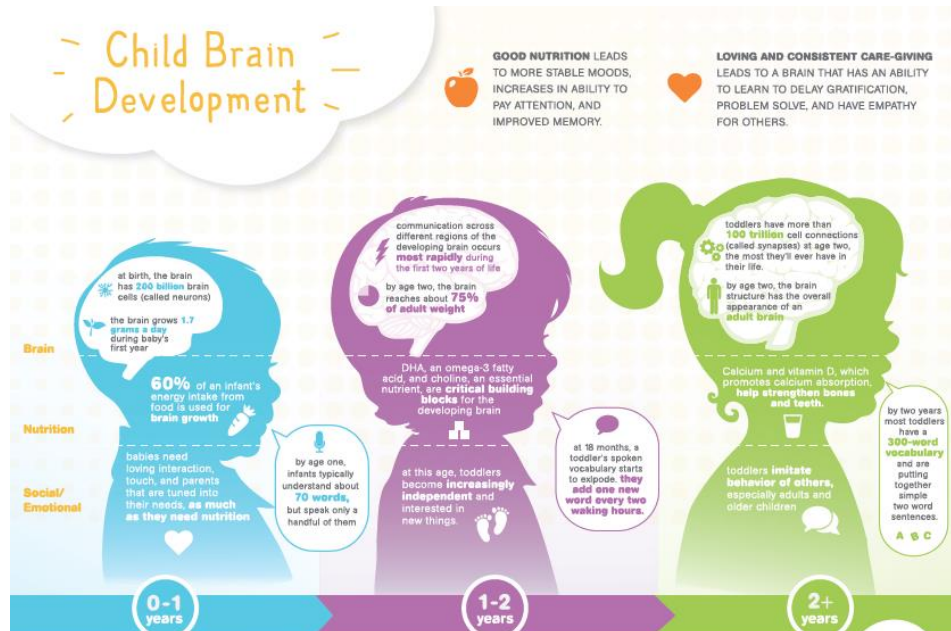

9. **Concentration:** The involvement in preschool task and activities demands higher levels of concentration from child.

10. **Patience:** In the life of an adult patience is often tested and children should be trained to handle such situation for the future.

Objectives

11. Confidence and self esteem : A sense of wellbeing is important for a person to explore their talents.

12. Brain Development: Professionally crafted activities in preschool enhance the development of the brain.

Objectives

13.Exposure to diversity:

There is so much diversity in the modern world and children need to be taught to appreciate and accept the difference in society.

14. Good Habits: Cleanness and Hygiene
